HAZMAT LABEL ANATOMY

Find the hazmat labels and placards you need to ship at Lion.com/Labels.

Hazard symbol/pictogram
A universal, visual representation of the material’s hazard.

Inner border line
Must be 2mm wide and placed 5mm from the edge of the label.

Background color
49 CFR requires all hazmat labels to conform to specific color specifications.

Descriptive text
In addition to the pictogram and Hazard Class, text may be used to indicate the hazard.

Label edges
Hazmat labels must measure at least 100mm (3.9in) on each side.

Hazard class/division
Provides the hazard class or division, 1–9, of the material.
