

LION EH&S "CHEAT SHEET" SERIES (#002)

# EPCRA Chemical Reporting: Toxic Release Inventory (TRI)

DUE: **JULY 1** (ANNUAL)

40 CFR 372

## Who Reports?

Facilities with **10 or more employees** in a range of industry sectors listed by SIC or NAICS code in 40 CFR 372.23, who manufactured, processed, or used a listed chemical in excess of its reporting threshold in the reporting year (previous calendar year).

## Covered Chemicals

TRI reporting covers about 800 chemicals with acute or chronic health or environmental effects, listed in 40 CFR 372.28. and 372.65.

Widely-used substances like methylene chloride, ethylene, hydrochloric acid, ammonia, and more are covered, along with hundreds of per- and polyfluoralkyl substances (PFAS) added to the TRI program in recent years.

## Also Known As...

Mandated by the Emergency Planning and Community Right-to-Know Act (EPCRA), TRI reporting is sometimes called Form R, EPCRA 313, SARA 313, or *Toxic Chemical Release Reporting*.

## Reporting Thresholds

**25,000 lbs.**

FOR CHEMICALS  
MANUFACTURED,  
IMPORTED, OR  
PROCESSED

**10,000 lbs.**

FOR CHEMICALS USED  
ANY OTHER WAY

**Lower thresholds**

FOR "CHEMICALS OF SPECIAL CONCERN"  
[LISTED IN 40 CFR 372.28 \*]

\* "Chemicals of special concern" include: aldrin, chlordane, hexachlorobenzene, and other chemicals; mercury, lead, and their compounds; dioxins; polychlorinated biphenyls (PCBs); and PFAS.
